Introduction to Machine Learning with Python

A GUIDE FOR DATA SCIENTISTS

Andreas C. Müller & Sarah Guido

Introduction to Machine Learning with Python

Machine learning has become an integral part of many commercial applications and research projects, but this field is not exclusive to large companies with extensive research teams. If you use Python, even as a beginner, this book will teach you practical ways to build your own machine learning solutions. With all the data available today, machine learning applications are limited only by your imagination.

You'll learn the steps necessary to create a successful machine learning application with Python and the scikit-learn library. Authors Andreas Müller and Sarah Guido focus on the practical aspects of using machine learning algorithms, rather than the math behind them. Familiarity with the NumPy and matplotlib libraries will help you get even more from this book.

“This book is a fantastic, super-practical resource for anyone who wants to start using machine learning in Python—I just wish it had existed when I started using scikit-learn!”

—Hanna Wallach

Senior Researcher, Microsoft Research

With this book, you'll learn:

- Fundamental concepts and applications of machine learning
- Advantages and shortcomings of widely used machine learning algorithms
- How to represent data processed by machine learning, including which data aspects to focus on
- Advanced methods for model evaluation and parameter tuning
- The concept of pipelines for chaining models and encapsulating your workflow
- Methods for working with text data, including text-specific processing techniques
- Suggestions for improving your machine learning and data science skills

Andreas Müller earned a PhD in machine learning from the University of Bonn. After working as a machine learning researcher on computer vision applications at Amazon, he joined the Center for Data Science at New York University. He's also a maintainer and core contributor to scikit-learn.

Sarah Guido is a data scientist who has spent a lot of time working with startups, and most recently served as Lead Data Scientist at Bitly. An accomplished conference speaker, Sarah earned a Master of Science in Information from the University of Michigan.

Table of Contents

Preface.....	vii
1. Introduction.....	1
Why Machine Learning?	1
Problems Machine Learning Can Solve	2
Knowing Your Task and Knowing Your Data	4
Why Python?	5
scikit-learn	5
Installing scikit-learn	6
Essential Libraries and Tools	7
Jupyter Notebook	7
NumPy	7
SciPy	8
matplotlib	9
pandas	10
mglearn	11
Python 2 Versus Python 3	12
Versions Used in this Book	12
A First Application: Classifying Iris Species	13
Meet the Data	14
Measuring Success: Training and Testing Data	17
First Things First: Look at Your Data	19
Building Your First Model: k-Nearest Neighbors	20
Making Predictions	22
Evaluating the Model	22
Summary and Outlook	23
